100% Integrated Solution

- NO export/imports, NO double-keying (increased data integrity between applications)

- Integration with:
  - General Ledger (for GL postings)
  - Accounts Payable (for asset purchases)
  - Purchasing (for asset purchases)
  - Accounts Receivable (for asset sales)
  - Project Series (associate GL postings with a project/task)
  - Service Series (link a piece of equipment to an asset)

Solomon Visual Basic Solution

- Consistent look and feel with other Solomon modules, minimal training required

- Benefit from the same advantages inherent in other Solomon modules: customization / crystal reports / transaction import / templates / extendibility

30 Years of Fixed Assets Experience

- DataGroup Solutions have developed Fixed Assets software for 30 years

- In 1999 the first release of Fixed Assets for Solomon was introduced for v2.06 of Solomon

- Solely focused now on the Solomon application DataGroup Solutions have continued to develop and enhance the Fixed Assets module as well as having developed expertise in the implementation and support of the MBS Solomon product range
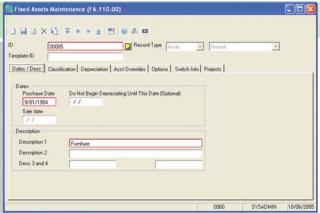

Deployed Internationally

- Australia, China, Estonia, Hong Kong, Indonesia, Jamaica, Kenya, Malaysia, New Zealand, Nigeria, Philippines, Singapore, Uganda, United Kingdom, United States, Vietnam
